E-COOP – DIGITAL COOPERATIVES
cooperate. virtually. everywhere.
3rd newsletter – June 2014

THE SECOND THEMATIC BROCHURE
"Digital Cooperatives": Who are the mediators and why are they needed? How will they be supported?

The second E-COOP brochure presents to readers the main focus of the Working Group 2, which are mediators. Digital mediators, or e-mediators, are not only employees of Digital Public Spaces, but also volunteers and many other intermediaries, like librarians, teachers or social workers. In order to create the next generation of Digital Public Spaces, that will be more than just a digital gate for public e-services, missions and main skills of these mediators have to evolve.

E-COOP BEST PRACTICES
The Polish Association for Dissemination of New Technologies and Local Community Development "e-Sochaczew.pl"

e-Sochaczew started as an initiative of a few committed persons who wanted to foster the local community by building an internet portal. Nowadays, its activities include not only the management of the portal with specific tools dedicated to local institutions, non-governmental organizations and the inhabitants themselves and internet bulletin news, but also providing social and market analysis, organising workshops, trainings courses, seminars, and also concerts, art and photography exhibitions, theatre performances.

An E-COOP platform

Jyväskylä goes Mobile

Mobile Municipality Jyväskylä is a free mobile application, used in Jyväskylä since 2012. With the app one can check the latest news, browse upcoming events and easily find the contact information of the local public services. The app users can also send feedback and service requests to the city officials. The application is available worldwide.

E-COOP is a project financed by the European Union in the framework of the INTERREG IVC programme. We are working to advance the Union's Digital Agenda through collecting, analysing and sharing local good practices on digital public services and by developing innovative Digital Public Spaces. We also aim to produce a set of comprehensive Policy Guidelines designed to improve local, national and EU-level decision-making and planning processes. Welcome to the latest newsletter of the project.
